PROFILE

Associate Engineer with hands-on experience in hardware design and development, specializing in PCB schematic design, layout, and hardware validation. Skilled in Embedded C, microcontroller-based development, circuit debugging, and RF amplifier board testing using Or CAD, Allegro PCB Editor, spectrum analysers, and signal generators. Strong foundation in Analog and Digital electronics, with a focus on developing reliable, production-ready hardware.

PROFESSIONAL EXPERIENCE

Associate Engineer – Hardware design and Development July 2026 – Present
Graduate Engineering Trainee July 2025 – June 2026

Rangsons Aerospace Pvt Ltd – Bangalore

- Created schematics, PCB footprints, and PCB layouts using Or CAD Capture CIS and Allegro PCB Editor for embedded and RF hardware.
- Supported embedded hardware bring-up, PCB debugging, continuity testing, and validation activities.
- Created PCB footprints and managed component libraries in Cadence Allegro PCB Designer, ensuring accurate package dimensions and compliance with industry standards.
- Worked on RF amplifier board testing and PCB-level integration for embedded RF modules.
- Used oscilloscope, spectrum analyser, and signal generator for circuit-level testing, debugging, and hardware troubleshooting.

SKILLS

Embedded Systems	Embedded C, STM32 Microcontrollers, GPIO, Circuit Debugging.
PCB & Hardware Design	Schematic Capture, PCB Layout, Footprint Design, Hardware Validation.
EDA Tools	Or CAD Capture CIS, Allegro PCB Editor.
IDE & Development Tools	VS Code, STM32CubeIDE
Version Control	Git, GitHub.
Communication Protocols	I2C, SPI, UART.
RF & Test Instruments	RF Amplifier Testing, Oscilloscope, Spectrum Analyser, Signal Generator.
Electronics Foundation	Analog & Digital Electronics.
Soft Skills	Effective Communication, Teamwork & Collaboration, Problem-Solving.

EDUCATION

Bachelor of Engineering – Electronics and Communication Engineering December 2021 – May 2025
Cauvery Institute of Technology, Mandya, Karnataka - CGPA: 8.79/10

PROJECTS

- 1. RF Power Amplifier PCB Design & Testing** Aug 2025 – Present
Designed and validated an RF amplifier PCB using spectrum analyser and signal generator for RF signal analysis.
- 2. Dynamic EV Wireless Charging System** March 2025 – May 2025
Developed a dynamic wireless charging system for electric vehicles using Arduino Uno and resonant inductive coupling.

PARTICIPATION AND AWARDS

- Winner, College Kabaddi Tournament (2022) – Demonstrated teamwork and endurance as part of the 1st place team.
- IEEE Student Congress Participant – Gained exposure to emerging technologies, entrepreneurship, and hands-on PCB design.

CERTIFICATIONS

- Embedded System** - Microcontroller Embedded C Programming.
- PCB Design** – PCB Designing using Or CAD and Allegro PCB Editor.
- Certified in Soft Skills** – Wadhwani Foundation.

DECLARATION: I hereby declare that the information provided above is true and correct to the best of my knowledge and belief.
